

Ahmed Ben Mohamed

Cybersecurity Engineer • Cloud & AI

Ariana, Tunis • ahmedbenmohamed99@gmail.com • +216 99 802 525

[Portfolio](#) • [LinkedIn](#) • [GitHub](#)

Profile

Cybersecurity engineer, recently graduated from TEK-UP University in Security of Computer Systems and Networks. **Global Second Prize** winner in the [Huawei ICT Competition](#) (Cloud Track, 2026) and **five-time Red Hat certified**. Built an autonomous SOC platform combining SIEM, machine learning, and SOAR that detects and contains incidents in under 35 seconds, and conducted a full regulatory audit of a production web platform for a government-sector client within an ANCS-certified firm. Works at the intersection of offensive security, security operations, cloud, and applied machine learning.

Awards & Competitions

[Huawei ICT Competition 2025–26 — Cloud Track, Global Second Prize](#) (Shenzhen, China)

2026

Represented Tunisia: national selection → 3rd prize, North Africa regional → global final · Certificate No. ICTC20260102000062

- Team of three in an 8-hour hands-on lab on Huawei Cloud; main focus on cloud infrastructure, with additional work on AI (ModelArts).
- Worked across a broad range of Huawei Cloud services: compute, networking, storage, databases, containers (Kubernetes/CCE), security and monitoring.
- Solved unfamiliar problems under strict time pressure, splitting tasks and coordinating as a team.

Professional Experience

Cybersecurity Engineer — Final Year Internship (PFE), Next Step IT

02/2026 – 07/2026

- Built an autonomous SOC platform combining SIEM, machine learning, and SOAR to automate security incident detection and response.
- Developed an AI detection pipeline using Random Forest (97.7% accuracy, AUC 0.9954) and Isolation Forest for anomaly detection on real-time Wazuh 4.7.3 alerts.
- Implemented a SOAR engine performing IP blocking (iptables, FortiGate), network isolation, and SSH process termination in under 35 seconds with no human intervention.
- Validated against real MITRE ATT&CK techniques using Atomic Red Team; built L1/L2/L3 ticketing with automated PDF incident reporting.

Python, Flask, scikit-learn, Wazuh, OpenSearch, Groq API (Llama-3.3-70B), FortiGate API, Paramiko, VMware.

Cybersecurity Audit Intern, Smart Skills (TAC-TIC Group)

07/2025 – 08/2025

- Performed black-box and grey-box penetration testing of a production web platform for a government-sector client, following OWASP Top 10 and WASC-TC methodologies.
- Identified 10 security defects (2 critical, 2 major), including SQL injection, unauthenticated remote code execution, stored XSS, and broken access control.
- Scored findings with CVSS v3 and conducted ISO/IEC 27001 / MEHARI-based physical security audits across three sites; produced client-facing audit deliverables.

Nessus, Acunetix, OWASP ZAP, Burp Suite, Nmap, SQLmap, Nikto, Kali Linux, CVSS v3, ISO 27001.

Cybersecurity & AI Intern, NxC International

07/2024 – 08/2024

- Built a chatbot that generates Kusto Query Language (KQL) detection queries from natural-language threat descriptions for SOC analysts.
- Fine-tuned LLaMA 2 and LLaMA 3 using RAG and LoRA, integrated MITRE ATT&CK, and connected the system to Microsoft Sentinel and Defender via REST APIs.

Certifications

Five Red Hat certifications — verify at [Red Hat ID 240-234-609](#).

- Red Hat Certified Engineer (RHCE) — Enterprise Linux (EX294)
- Red Hat Certified System Administrator (RHCSA) — EX200
- Red Hat Certified Specialist in Containers — EX188 (Podman)
- Red Hat Certified Engineer & Advanced System Administrator in Ansible
- Red Hat Certified Developer in Cloud-native Applications

2025

2024

2025

2025

2025

Education

Engineering Degree — Security of Computer Systems and Networks (SSIR), TEK-UP University

2023 – 2026

Advanced Technician Diploma — Electronics, Electrical Engineering & Automation, ISSI Gabès

2020 – 2023

Selected Projects

- **Infrastructure VPN-MPLS** — VPN-MPLS with VRF, HSRP, EtherChannel, VLANs; Zabbix monitoring; secured with FortiGate, AAA/RADIUS, ACLs, SNMPv3.
- **Network Access Control (NAC)** — PacketFence NAC integrated with SIEM; access via Active Directory and firewall policies.
- **PhishingMail Detector** — LLM-based phishing-email detection and threat classification, with an interactive dashboard.

Technical Skills

- **Security Operations:** SIEM (Wazuh, Microsoft Sentinel, Splunk), SOAR automation, Microsoft Defender, KQL, MITRE ATT&CK, Atomic Red Team, incident response.
- **Offensive Security & Compliance:** Penetration testing, vulnerability assessment, OWASP Top 10, CVSS v3, Burp Suite, Metasploit, SQLmap, Nessus, ISO/IEC 27001, MEHARI.
- **Networking:** VPN, MPLS, SD-WAN, NAC (PacketFence), AAA/RADIUS, ACLs, FortiGate, Cisco Packet Tracer, GNS3, Nmap, Wireshark.
- **Programming & ML:** Python, Flask, REST APIs, Bash, SQL, Java, C, C++, scikit-learn, PyTorch, Hugging Face, LLM fine-tuning (LoRA), RAG.
- **Infrastructure & Cloud:** Red Hat Enterprise Linux, Ubuntu, Kali Linux, Docker, VMware, Git, Zabbix, Huawei Cloud (Kubernetes/CCE), Azure, AWS.
